

“Where I Would Live” A Plate Tectonics Story

Name: _____

Choose from the following list of places for where you would prefer to live in the world based on the plate boundary type. Include why you chose the location as well as why you didn't choose the other two. Be sure to include a description of each boundary type in your explanation.

1. Convergent boundary – Mt. Saint Helens, Washington (active volcano)
2. Divergent boundary – Iceland (active volcanos)
3. Transform boundary – San Francisco, California (earthquake zone)
