

# Sea Turtle Survivorship Assessment

1. What are the 4 stages of a sea turtle's life cycle?

2. Use the data given to calculate the percentage of sea turtles that lived and died during natural conditions as well as human induced threats. Put your answers in the tables.

Eggs to Adult Survival in Natural Conditions

	Number	Percentage (%)
Lived	42	
Died	78	

Eggs to Adult Survival with Human Induced Threats

	Number	Percentage (%)
Lived	1	
Died (Natural)	78	
Died (Human)	41	

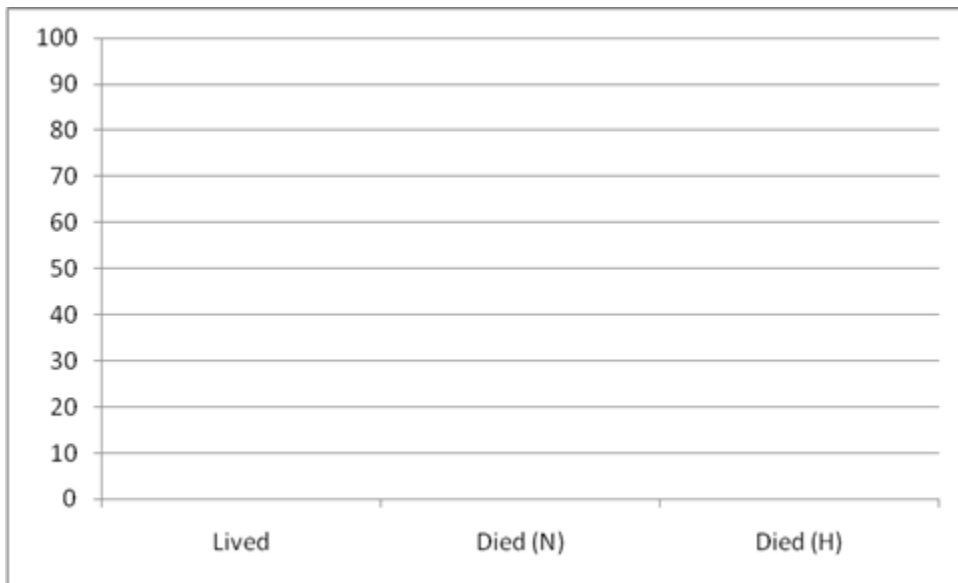

3. Use the calculated percentages to create a Natural Conditions bar graph.

4. Explain the results of the Natural Conditions graph.

# Sea Turtle Survivorship Assessment

5. Use the calculated percentages to create a Natural and Human Impacts bar graph.

6. Explain the results of the Natural and Human Impacts graph.

7. Compare and contrast the two graphs.

8. List 3 natural threats to sea turtles.

9. List 3 human induced threats to sea turtles.

10. Name 3 things you can do to help protect sea turtles.
