

# Marine Mammal Distribution Worksheet

## Directions:

Plot the following marine mammal coordinates on the world map. Use the location and the species description to determine the species represented. Fill in the table with the correct species.

Latitudinal lines measure North and South while running East to West. Longitudinal lines measure East and West while running North to South.

## Species Choices:

Amazon river dolphin  
Bottlenose dolphin  
California sea lion  
Hawaiian monk seal  
Humpback whale

Narwhal  
North Atlantic right whale  
Orca  
Spinner dolphin  
Vaquita

	Latitude	Longitude	Description	Species
<b>1</b>	60°S	0°	Cooler waters with upwelling	
<b>2</b>	21°N	160°W	Nocturnal hunters	
<b>3</b>	30°N	80°W	Most common marine mammal in this area	
<b>4</b>	0°	60°W	Sightings are rare	
<b>5</b>	30°N	115°W	Smallest marine mammal	
<b>6</b>	40°N	160°W	Migrate through this area	
<b>7</b>	75°N	70°W	Deep diving marine mammals	
<b>8</b>	45°N	60°W	Feed here in summer	
<b>9</b>	20°S	90°E	Sub-tropic and tropic waters	
<b>10</b>	30°N	120°W	Playful and agile
